

Maestro QuickStart Guide

Basic instructions for setup and use of Maestro mobile control and streaming

Getting Started

Open your mobile device's web browser and browse to your ReQuest server IP address.

The first time you visit this URL, Maestro will display a pop up with instructions for adding Maestro to your home screen. Follow these instructions.

Exit the browser and you will see an icon for Maestro on your home screen. Tap it to launch.

Movies

Maestro will ask you to select a "target player". This is the MediaPlayer that you will control. This MediaPlayer will also provide your streaming source. **MediaPlayer is required to use Maestro for movies.**

Note: If multiple users select the same MediaPlayer as their target player,

they will only be able to stream one movie at a time.

Live Search: Provides live results Main Movie Menu as you type. Tap 🔀 to clear. Music

Maestro requires you to select an **Audio Source** to use for music. The sources are exactly the same as the ones your server uses, with some exceptions.

Selecting a regular output source (ie. "Living Room") will let you control what is playing **in that room**.

Selecting a streaming source (ie. "Stream Living Room") will let you control that room and also stream live to your device.

Selecting This Device streams only to the Maestro device and does not control any actual server sources in the home.

this d serve	ming sources control the server and play on levice. Non-streaming sources just control th r. This device only plays here and doesn't ol the server.

Room Control (iQ ONLY): Tap this button to control a different room of the house.

Audio Source: Tap this button bring up the Audio Source popup show above.

Covers: Tap a cover to go to that album's details OR press and hold to bring up a context

$\langle i i \rangle$

- Play Now
- Play Next
- Add to Now Playing Queue
- Add to Playlist

Swipe - This menu can be swiped to dismiss or you can tap this hand icon.

List / Cover View: Toggle between viewing a list or a cover art grid (shown)

Basic instructions for setup and use of Maestro mobile control and streaming

List Menu: From anywhere in the list menu, you can either tap the selection to drill down into that category (Artist, Album, Genre, Playlist, Song, Recently Added music, Recently Played music, Now Playing music, Streaming Stations, Pandora, or Sirius XM) **OR** you can bring up a submenu by tapping the hand icon or gesture-swiping that entry.

- Play this selection now
- Play this selection next
- Add this selection to my Now Playing Queue
- Add this selection to a specific playlist
- Close this submenu (swipe in the direction of the arrow to open or close any swipeable menu).

Once you have drilled down at least one level (ie. "Artist") the search function will become active.

Tap Search to bring up a live search bar. Results will begin filtering within the category you currently have selected.

Tap 😣 to clear.

Settings General Settings								
Check if video player is online when starting	Check	-						
Show Stop Button on Audio Player	Don't show	•						
Streaming Audio Bit Rate	Use Server Setting (192 kbps)	-						

General Settings: Here you can set Maestro to always check if the target player is online before proceeding.

You can also enable or disable the stop button in transport controls.

Finally, you can change your audio bitrate. If you want your music to stream faster (especially over cellular data networks), set it to a lower bitrate. If you want better quality (preferably over a reliable WiFi connection) select a higher bitrate.
