

Maestro URL Launch Parameters

All URLs base from the same address:

<http://<ip of server>/maestro/index.php?>

Tab

The tab parameter controls what tab Maestro launches into.

Parameter: tab

Values: movies, music, player, remote, widgets, settings

Example: <http://<ip of server>/maestro/index.php?tab=movies>

<http://<ip of server>/maestro/index.php?tab=music>

View

The view parameter applies to the movies and music tabs and controls whether the displayed items are in the cover art grid or list format.

Parameter: view

Values: list, grid

Example: <http://<ip of server>/maestro/index.php?tab=movies&view=grid>

<http://<ip of server>/maestro/index.php?tab=music&view=list>

Zone

The zone parameter directs Maestro to control or stream from any available zone on the ReQuest server without needing to change the current zone from the Settings page or zone selector.

Parameter: zone

Values: 1, 2, 3, 4, 5, 6, stream_1, stream_2, stream_3, stream_4, stream_5, stream_6, local

Example: <http://<ip of server>/maestro/index.php?zone=1>

Target (minimum SPOS 6.5.2.4955)

The target parameter directs Maestro to issue commands and browse on-behalf-of the specified MediaPlayer without needing to change the current target from the Settings page or zone selector.

Parameter: target

Values: serial number of MP to send commands to

Example: <http://<ip of server>/maestro/index.php?target=MPP30124>

Tabbar (minimum SPOS 6.5.2.4955)

The tabbar parameter directs Maestro to hide the bottom navigation selection tabbar. The default is 1 (show the tabbar).

Parameter: tabbar

Values: 0, 1*

Example: <http://<ip of server>/maestro/index.php?tabbar=0>
