

ReQuest

SERIOUS PLAY

The Ultimate Music Machine

The ReQuest F3 Server is the brains of any true music aficionado's listening system.

F3 encodes your CDs in lossless WAV for perfect playback and delivers it through a variety of intuitive and vibrant interface options.

ReQuest is the only system with Classical Music Mode built-in allowing classical enthusiasts to shuffle their music collection by performance.

Add a MediaPlayer and the ultimate music system becomes the ultimate movie system as well.

The optional whisper-quiet solid state hard drive combines with F3's fanless chassis to ensure a pristine listening experience.

Automatic dual encoding allows you to listen to high quality music at home while having smaller files for iPods and streaming. The digital output guarantees your music arrives at the amplifier unimpeded and ready to shake the house.

The F3 is capable of playing back 96kHz/24-bit HD Audio for the most realistic sonic experience and deepest detail available to any format anywhere.

F3 Multi-Zone Music and Movie Server
