

# Harmony Ideas

Putting the Harmony Commercial Music & Digital Signage system to work for you.

## Digitally controlled price list • Keep every location current

You've thought of every aspect of your brand and message from the color of your logo to the dress code of your employees. If your price list is just a paper sign or a board full of plastic letters, it is not really under the same level of control, but it can be.

With the Harmony system, nothing is left to chance. You make your own professional looking price list using the colors, fonts, and corporate identity that adheres to your standards and you deploy it instantly to full color screens at every location of your enterprise. No need to submit your changes to a third party digital signage company or wait for an employee at the end to print out and post the updates - you are in complete control.

Make changes, highlight specials, mix in your own custom marketing and video content, and with a click of the mouse your up-to-the-minute pricing is visible to your clientele.
